Publication of Psychological Abstracts to Cease with December 2006 Issue

As use of electronic databases has expanded, subscriptions to the print index have declined to a point where it is no longer feasible to publish a print edition. Consequently, after 80 years of publication, *Psychological Abstracts* will end with Volume 93, No. 12 in December 2006. We believe we can better serve subscribers in other ways. The American Psychological Association also produces PsycINFO; this electronic database includes nearly 2.3 million records dating from the early 1800s. Whereas page limitations precluded rapid growth in *Psychological Abstracts*, the database is now growing very rapidly; 116,000 records were added in 2005. APA offers site licenses to institutions (see www.apa.org/psycinfo) and economic electronic packages to members (see www.apa.org/access) and nonmembers (see www.apa.org/gold).

PA

PsycINFO, a family of interrelated information services, provides access to the literature in psychology and related behavioral and social sciences in a variety of ways. PsycINFO consists of

Psychological Abstracts (PA) journal (ISSN 0033-2887). The comprehensive monthly compilation of nonevaluative summaries of the serial and book literature in psychology and related disciplines.

Issue. The monthly **PA** issues contain entries listed under 22 major classification categories, with some categories having subsections, as shown in the Table of Contents. Under each classification heading, the records are arranged alphabetically by first author, and are numbered consecutively each year.

Indexes. An author, brief subject, and book title index appear in each monthly issue. An expanded and integrated annual index is published at the end of each volume.

PsycSCAN®: Clinical Psychology. A quarterly print publication and electronic subset of the PsycINFO database containing abstracts from subscriber-selected journals in clinical psychology.

Neuropsychology Abstracts. Formerly known as *PsycSCAN: Neuropsychology*. A quarterly print publication and electronic subset of the PsycINFO database covering clinical and human cognitive experimental areas of neuropsychology.

Psychoanalytic Abstracts. Formerly known as *PsycSCAN: Psychoanalysis*. A quarterly print publication and electronic subset of the PsycINFO database containing abstracts of psychoanalytic content.

The Thesaurus of Psychological Index Terms© 9th Edition (2001). A compilation of the controlled vocabulary used when creating records for PsycINFO databases.

PsycSCAN®: Applied Psychology. An electronic-only subset of the PsycINFO database that contains abstracts from subscriber-selected journals related to applied psychology.

PsycSCAN®: Behavior Analysis & Therapy. An electronic-only subset of the PsycINFO database that contains abstracts of content covering behavior analysis and therapy.

PsycSCAN®: Developmental Psychology. An electronic-only subset of the PsycINFO database that contains abstracts from subscriber-selected journals in developmental psychology.

PsycSCAN®: LD/MR. An electronic-only subset of the PsycINFO database containing abstracts related to learning and communication disorders and mental retardation covering a wide range of topics, including theories, research, assessment, treatment, rehabilitation, and educational issues.

PsycSCAN: Psychopharmacology®. An electronic-only subset of the PsycINFO database with targeted information about clinical and experimental psychopharmacology.

PsycINFO® Database. An electronic bibliographic database for professionals in behavioral sciences and mental health. It includes abstracts and citations (not full text) for journals, books, book chapters, and dissertations. Coverage extends from 1842 to present. The database includes material relevant to psychologists and professionals in related fields such as psychiatry, management, business, education, social science, neuroscience, law, medicine, and social work.

PsycEXTRA, a companion database to the scholarly PsycINFO, links clinicians, librarians, consumers, policy-makers, and researchers to a variety of credible information sources covering psychology, behavioral science, and health. Documents include newsletters, magazines, newspapers, technical and annual reports, government reports, consumer brochures, and more. PsycEXTRA is different from PsycINFO in its coverage, and also in its format, because it includes abstracts and citations plus full text for a portion of the records.
